

# Pump solutions

Tailor-made pump packages

**creating  
new history**

## Key features

- Extend experience in rotating equipment packaging
- Providing the right pumping and system solution for every application in cooperation with, but not limited to, Houttuin, Allweiler, IMO Pumps, Warren, Torishima, etc
- Wide range of capacities and pressures
- Different pump types such as centrifugal, single, two and three screw
- Compliance to most international standards: API, ISO, VDMA, Hydraulic Institute, etc
- Electric motor, diesel/gas engine, steam turbine driven
- Oversized, rigid, vibration free base frame
- State of the art PLC control systems up to Safety Integrity Level (SIL 3)
- Easy maintenance due to sophisticated design
- Service and commissioning for SES units
- Highly efficient Lube oil systems according to API 614
- Non-API lubrication systems
- Safe and Hazardous Area Classification
- All Stainless steel construction
- Reliable operating system
- Reducing expensive downtime of the rotating equipment

## Tailor-made packages

SES International has extensive experience with fully integrated pump solutions. Based on the bare shaft principle, pump systems from SES International are used in various industries and processes. SES is dedicated to providing each client with the right product to suit customer specific needs. Whether this involves designing a high spec system or an basic pump package, we will work with you to achieve the most reliable, cost-effective solution.

## Highlights

Crude oil pumps

Water injection pump

Fuel forwarding pumps

## Experts you can count on

With over 50 years of experience, SES International is a global leader in the manufacturing rotating equipment packages for the oil and gas, petrochemical and refrigeration industries. We supply high quality, tailor-made compressor packages backed up by our own service department for total maintenance and spare parts.
